## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-4 and 9-12 are rejected under 35 U.S.C. 102(b) as being anticipated by Mitani et al. (5,831,648).

FIG. 31

Mitani et al. teaches (Fig. 31, above) an ink jet recording head comprising a head body, a plurality of orifices (312), a plurality of ink ejection units (303) corresponding to

Art Unit: 2853

each of the orifices, an individual flow path (309) for supplying ink to each orifice, a common flow path (310), an ink supply bore (314) (shown in Fig. 32B) formed on a side opposite the orifice and a metallic film (303') formed on at least on apart of at least one side of the head body and opposite the orifices. Mitani et al. further teaches that the metallic layer is an oxidized film of Ta-Si-SiO, therefore, the layer would contain Ta. Furthermore, the layer has a thickness of 0.1 microns (col. 25:34-37).

### ***Response to Arguments***

3. Applicant's arguments filed 05/30/02 have been fully considered but they are not persuasive.

Applicant's argument that the Ta-Si-SiO later taught by Mitani et al. does not read on the limitation, "metallic film," is not persuasive. The Applicant has provided a definition of the term "oxide," which teaches that an oxide is a mineral and not a metal. The question is not whether the layer taught by Mitani is a metal, but whether it is metallic. The Examiner has provided a definition of the term metallic, which states that the term means: "made of or containing a metal." Since, Ta-Si-SiO contains, a metal, that is Ta, this layer would be metallic and would meet the limitation as claimed.

### ***Conclusion***

4. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.
